Skan^AI

WHY AI AGENTS
KEEP FAILING
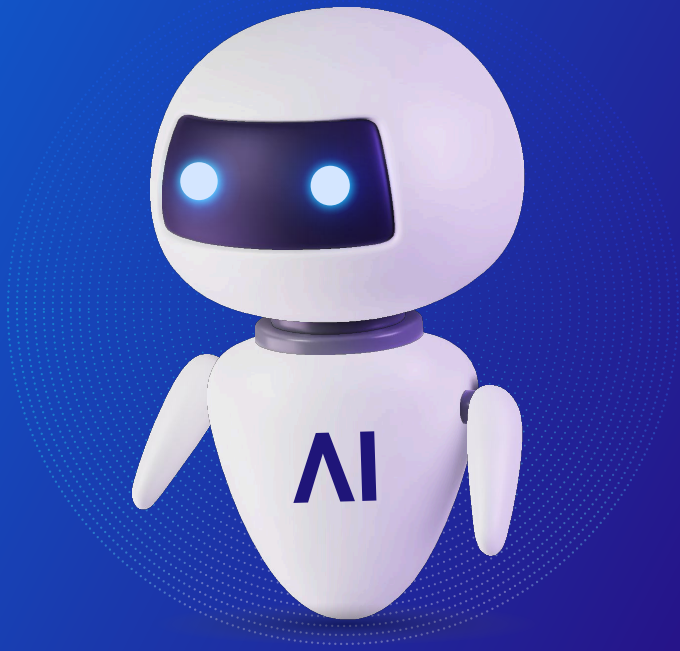

Why 40% of Agentic AI Projects
Will Be Cancelled by 2027
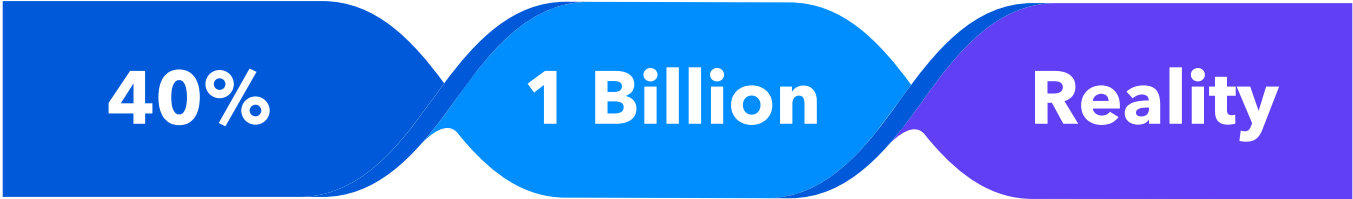

40%	1 Billion	Reality
Projects cancelled by 2027[1]	Agents by 2026[2]	Failure to meet ROI expectations

Ditch Sophisticated Mimics

- Bots still following preset rules
- Rigid execution
- Trapped by happy paths
- Sticks to preset procedures
- Brittle automation

Embrace True Intelligence

- Human + AI collaboration
- Creative problem-solving
- Contextual decisions
- Moral reasoning
- Adaptive learning

Pro Tip: Stop building systems that **LOOK** intelligent but lack human intelligence.

Companies that understand this distinction will build the most valuable AI systems of the next decade.

UNLOCK AGENTIC AI WITH PROCESS INTELLIGENCE
